# TUMexchange: Selection ratio according to partner universities

The table below shows the percentage of applicants who were nominated for different partner universities of their choice in the three previous selection rounds. The percentage of applicants nominated for each partner university is displayed in 4 categories:

🔴⚪⚪⚪	: ≤ 25%
⚪🟡⚪⚪	: 26-50%
⚪⚪🟢⚪	: 51-75%
⚪⚪⚪🟢	: ≥ 76%

For universities without given selection ratio no exchange took place in the respective academic year.

Please note: It is possible to apply for up to two universities. Many of the candidates who were not nominated for a particular partner university of their choice could be considered for one of the other partner universities. For this reason, the table only provides a general overview on the "popularity" of individual partner universities in the respective selection round. These tendencies can vary from selection round to selection round for different reasons.

In general, above average grades and language skills are required to be selected for an exchange in a very popular country. To apply to English speaking universities in North America and Australia, outstanding academic performance and very good English language skills are required (at least level C1).

Please understand that we cannot assess individual opportunities. The place quotas have to be re-negotiated every year with each individual partner university. Applicant pressure per university depends on the number of available exchange places, the number of applications submitted and the quality of the applications.
Country	Partner University	Selection ratio 2020/21	Selection ratio 2021/22	Selection ratio 2022/23	Selection ratio 2023/24
