

Letter of Motivation

Your motivation letter should be 1-2 pages. Please name the project code and the name of the project of your choice in the header. You can address your potential future project supervisor by her/his name (e.g. "Dear professor X"), or if the name is not available in the project description in the [TUM PREP Project Database](#), you may start your letter with "Dear TUM PREP project supervisor". In your letter, concentrate on your motivation to participate in the particular project, on your potential prior knowledge regarding the research field and on your potential prior research experience in general or classes you took which prepared you for the particular research project.

You can give one or two project priorities and also name further projects of your interest. If you named a priority 2, please also hand in a motivation letter for it. You are free to also upload motivation letters for your further priorities (3, 4 etc.), but this is optional. Please join all letters as of priority 3 (meaning all letters except the ones for priority 1 and 2) in one single PDF file.
