

TUMexchange selection ratio among partner universities

This chart provides an overview to better assess the chances of being selected for each partner university within the TUMexchange program. The graphic shows the past three selection rounds. It is based on the number of exchange spots available at the respective partner university and the number of applications from TUM students.

How to read the chart:

- Long bar: Higher chance to be selected for the corresponding university since there was a rather low number of applicants.
- Short bar: Lower chance to be selected for the corresponding university since there was a higher number of applicants.
- "no cooperation": Partnership agreement with the corresponding university wasn't signed. We now have a valid partnership agreement for the upcoming selection round.
- "no places": Partner university didn't offer any exchange spots to TUM, so we couldn't select any students for this university. We have exchange spots available for the upcoming selection round.
- "no applicants": We received no applications for the corresponding university.

Please note:

This chart only provides a general overview of the "popularity" of individual partner universities during the past three selection rounds. These trends will vary each academic year for various reasons.

For partner universities that receive a large number of applications, note that above-average grades and language skills are required. Please understand that we cannot assess your specific chances of being approved for any particular university individual opportunities during the application process.

Your TUMexchange Team
